March 15, 2021

Dear Flex-Ability Concepts Customer,

Due to increases in raw materials prices, primarily steel, we find it necessary to increase the prices for our products. While it is unprecedented in our organization to have two price increases so close together, these are anything but normal times. The increases will be approximately 10% and will take effect April 15th, 2021. The new price list has been attached to this announcement. All job specific quotes given prior to today will be honored.

We are glad to have partners like you with whom we can work as we navigate together the current conditions.

Best regards,

Robert Widmer
Flex-Ability Concepts
