Subject: Monthly Transportation Surcharge Assessment Update

In order to implement appropriate adjustments to our Transportation Surcharge (up or down) with the fluidity of today's freight market, CertainTeed Architectural conducts a monthly freight review and communicates any updates by mid-month for implementation effective the following month. Based on our latest freight assessment of the CASS Line Haul and # 2 Diesel indexes against the established charge tables below **CertainTeed Architectural will increase the Transportation Surcharge to \$760 per truck for the month of June**. The Transportation Surcharge will continue to be charged on all full truck shipments of acoustic ceiling panels and suspension system products, and applied on a weighted basis to Multi-Stop and Pooled truck orders.
