August 21, 2023

Dear valued Owens Corning® Insulation customer,

Effective November 1, 2023, Owens Corning Sales, LLC (“Owens Corning”) will increase U.S. prices as follows:

Product Name	% Increase (All States)
FOAMULAR® extruded polystyrene (XPS) foam board products	10%
FOAMULAR® NGX™ extruded polystyrene (XPS) foam board products	10%

Full truck or CPU orders with scheduled ship dates prior to November 1, 2023, will receive current pricing. All orders shipping on or after November 1, 2023, will be priced at the new levels regardless of when the order was placed. Owens Corning reserves the right to limit the quantity of orders placed in advance of this increase.

All existing and new job quotes will be managed on an individual basis.

In addition, we would like to announce **the upcoming discontinuation of our legacy Foamular® XPS in favor of the full US market transition to Foamular® NGX™** (Next Generation Extruded), our extruded polystyrene (XPS) product line produced with a foam blowing agent solution specifically designed to meet and exceed the requirements of regulatory changes currently taking place in the US.

US orders will begin transitioning to Foamular® NGX™ starting in November 2023. Your local Area Sales Manager will work with you to determine your exact transition date.

The Foamular® NGX™ product line retains the signature Owens Corning® Pink® color, while including visible differentiation from our current line to help customers easily distinguish between the two. **These products deliver all the same great quality, performance and variety you expect from the Foamular® brand.**

Foamular® NGX delivers best-in-class performance, including:

- Excellent energy efficiency in the form of a high R-5 per inch
- Extremely low water absorption potential, delivering superior R-value retention in the presence of water
- A wide range of compressive strengths – up to 100 psi – to handle heavy loads
- Updated listings to ensure all the same compliance as our legacy products
- The only XPS with a limited lifetime warranty that guarantees a minimum 90% of R-value for the life of the product
- Zero ozone depletion potential

Customers will receive the same best-in-class service and support with Foamular® NGX™. All Owens Corning XPS Foam plants serving the North American market are fully equipped to produce the new product, ensuring the product you need will be available when you need it.

Thank you for continuing to be a valued Owens Corning customer. We look forward to our ongoing partnership and mutual growth with Foamular® NGX™.

Please reach out to your local Area Sales Manager with any questions.

Sincerely,

Rodney Wideman
Vice President & General Manager
