May 11, 2022

Dear valued Owens Corning® Insulation customer,

The average U.S. #2 diesel retail price has increased above \$4.76 per gallon for more than 60 consecutive days. Consistent with service guidelines, Owens Corning will increase its fuel surcharge in the United States from \$180 per truckload to **\$300 per truckload for all fiberglass building insulation and loosefill insulation products except for shipments from California.**

Owens Corning will also be increasing its fuel surcharge from \$210 per truckload to **\$330 for all fiberglass building insulation and loosefill insulation products on all shipments from California.**

This change is **effective with orders shipped on or after May 18, 2022**, regardless of entry date. We will continue to monitor diesel prices through the [U.S. Department of Energy](#) and adjust surcharges accordingly.

Click to view and download the [Fuel Surcharge tables](#) for your records.

Thank you for your continued support of Owens Corning.

Sincerely,

A handwritten signature in black ink, appearing to read "Mike Swift", is positioned above the typed name.
